

CHS-900

MSRP STARTING AT:

SAIMA

NORTH AMERICA

The CHS-900 is an extended square cabin, ADA compliant security portal system based on classic manual hinged door design. As always, SAIMA's standard weight management system provides protection against any piggybacking or tailgating into a secure area. Options on the CHS-900 include; Metal Detection, Volumetric Object Detection, Biometric Identification Systems, etc. Using programmable logic, the CHS-900 is compatible with virtually any of today's access control security systems and arrives ready to be integrated with the specific identification systems the end-user has or wants to have installed.
