

MTL-700

MSRP STARTING AT:

SAIMA

NORTH AMERICA

The MTL-700 is a square chamber security portal system with a square external frame and retracting single glass door design. The single vestibule is designed to allow single or bi-directional operation. The MTL-700's compact design provides faster transit and a higher throughput (people/minute) ratio. SAIMA's standard weight management system provides protection against any piggybacking or tailgating into a secure area. Options on the MTL-700 include Metal Detection, Volumetric Object Detection, Biometric Identification Systems, etc. Using programmable logic, the MTL-700 is compatible with virtually any of today's access control security systems and arrives ready to be integrated with the specific identification systems the end-user has or wants to have installed.

Options / Accessories:

- 37 mm Glass - Antiballistic Rating: Level 3
- Emergency Exit Manual Release System
- Metal Detection
- Volumetric Evaluation System*
- VIDO Color Wide-Angle Camera
- MESA Standalone Biometric Fingerprint Reader - Holds 800 Prints
- Entrance Ramps
